Advanced Embedded Systems – 23SP

Mini Project 0 - cjh9fw - Keshara Weerasinghe

1. Simulator Output

```
UART #1
                                                                                                             д 🗵
 HelloWorld: Keshara Weerasinghe
 Call Stack + Locals UART #1 Memory 1
                                    Simulation
                                                                t1: 1.52625232 sec
                                                                                  L:34 C:1
                                                                                                 CAP NUM SCRL
```

2. PuTTY Serial Output

```
COM8 - Putty
                                                                         HelloWorld: Keshara Weerasinghe
```

3. Survey Completion Page

Thank you for your feedback on Mini Project 1.
