## Advanced Embedded Systems – 23SP

## Mini Project 0 – cjh9fw – Keshara Weerasinghe

1. Simulator UART Window Output

```
UART #1
                                                                                                              ф 🔀
 HelloWorld: Keshara Weerasinghe
                   UART #1 Memory 1
 Call Stack + Locals
                                     Simulation
                                                                t1: 1.52625232 sec
                                                                                  L:34 C:1
                                                                                                  CAP NUM SCRL
```

## 2. PuTTY Serial Terminal Output

```
\times
HelloWorld: Keshara Weerasinghe
HelloWo
```
